

DIE COLLAR

RECOVERY

GENERAL DESCRIPTION

The Die Collar is an external catch tool designed to engage the O.D. of a fish. It cuts a thread into the fish to assure proper engagement.
Die Collars can be designed with a threaded bottom end for setting a guide or an oversize guide to assure fish engagement when the hole size is considerably larger than the diameter of the fish.

SPECIFICATIONS

Top Connection	2-3/8 REG	2-7/8 REG	3-1/2 IF
Fishing Neck OD	3-1/8	3-3/4	4-3/4
Max. ID Wickers	2-5/8	3-1/4	4-1/8
Mini. ID Wickers	1-1/4	1-1/2	2-1/2
Top Connection	4-1/2 IF	6-5/8 REG	7-5/8 REG
Fishing Neck OD	6-1/2	8	9-1/2 - 11
Max. ID Wickers	5-1/2	7	8-1/4 - 9-3/4
Mini. ID Wickers	3-1/4	4-1/2	5-3/4 - 7

USAGE RECOMMENDATIONS

Any item that can be retrieved by external engagement can be engaged by the Die Collar. The fish must have a clean O.D., long enough to allow entry of the fish into the Die Collar.
In operation it is necessary only to run the Die Collar in the hole to the top of the fish, apply less than one point of weight and rotate sufficiently to embed the tapered threads of the collar onto the fish, cease rotation and pull the fish.
