Enedril

Fishing and Drilling Solutions

DIRECTIONAL DRILLING & FISHING SOLUTIONS

FRANCE

ABOUT US

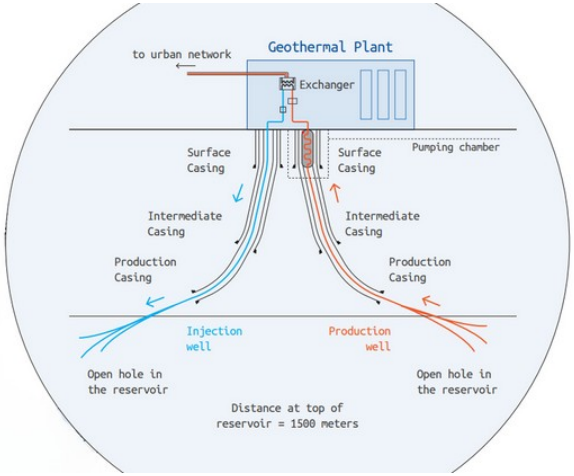

Enedril (formerly Mustang Services) is an independent French company founded in 2013, specialised in directional drilling, fishing and well intervention for geothermal, oil & gas and underground gas storage projects, in France and abroad. We combine field experience with technical know-how, and we are known for being fast, flexible and easy to work with.

OUR FACILITIES

Since 2021 we operate from Lons, near Pau, with two fully equipped workshops of more than 1,000 m², a 5 t overhead crane, a break-out unit, a jar tester, lathe, milling and grinding machines and a separate welding shop.

A 3,500 m² outdoor yard stores tubulars, stabilizers and on-site containers.

A rare equipment stock in France: mud motors from 3-1/8" to 9-5/8", shock tools, drilling jars, MWD kits and a very wide range of fishing tools.

Geothermal doublet: injection and production wells

98,500 m
drilled

60
wells, up to 3,000 m TVD

142
fishing, workover and P&A jobs

2,500
tools in stock

OUR VALUES

RESPECT
For our clients, our teams and the people and places around us.

TEAMWORK
Real success comes from strong values and working together.

ENVIRONMENT
Caring for the environment is at the core of what we do.

ISO 9001:2015 CERTIFIED

Quality followed on every job, from start to finish. About 15 clients supported each year, in France and abroad.

WHY CHOOSE US

EXPERIENCE
Years in the industry and a wide range of projects completed across sectors.

EXCELLENCE
Dedication to excellence, safety and innovation for superior results.

CUSTOM SOLUTIONS
Every project is unique: tailored tools and procedures.

RELIABILITY
A partner ready to go the extra mile to meet your needs and deadlines.

OUR PURPOSE

Supporting the next generations in the energy transition by contributing to the production of more responsible energy.

DIRECTIONAL DRILLING & MWD

Advanced directional drilling for complex wells with high precision requirements: downhole motors (PDM), rotary steerable systems (RSS) and high-temperature MWD tools. Experienced Directional Drillers and MWD Engineers steer and optimise the trajectory continuously, with well planning done in-house.

3-1/8" to 9-5/8"
PDM motors, HT power sections

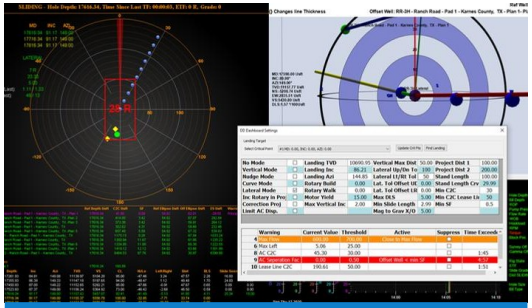

RSS
Push and point-the-bit

up to 200°C
MWD kits, HT electronics

MUD MOTORS & RSS

PDMs from 3-1/8" to 9-5/8" OD, wide range of power sections incl. high-temperature stators. Push and point-the-bit RSS.

WELL PLANNING

Innova and DrillScan: torque and drag, hydraulics and anti-collision, for safe and efficient drilling. Full simulation, high-frequency data recorder.

ALSO AVAILABLE

- Survey equipment (LWD, gyro, dual telemetry)
- Turbodrilling
- Jar placement
- Non-magnetic equipment
- Slimhole tools 3-1/2"
- High-temperature systems

98,500 m drilled · 60 wells · up to 3,000 m TVD

BOOST MUD PULSE MWD SYSTEM

Rock solid performance for aggressive drilling conditions. A positive mud pulse system sending surveys, directional telemetry, gamma ray and other sensor data to surface in real time.

- Field-proven design, standard rating 185°C, 200°C version available
- Top and bottom mounted positive pulse systems
- Motor-driven anti-plugging pulser: performs in LCM and high-solids mud
- Wide range of flow rates and rotary speeds, easy to assemble and service
- Down-linking for adjustable logging sequences (4 programmable)

OUTSIDE DIAMETER 47.6 mm (1.875")	PRESSURE RATING 20,000 psi
TEMPERATURE -20 to 185°C	COLLAR SIZES 3.5" to 8"
FLOW RATE 75 - 1,200 gpm	BATTERY LIFE 400+ h (2 modules)
SHOCK LIMIT 500 g	INTERNAL MEMORY 24 MB

Telemetry: inclination, azimuth, toolface, gamma ray, shock, vibration, RPM, stick-slip, temperature, annular pressure, battery status.

Inclination	Azimuth	Toolface	Temperature
±0.10°	±0.50°	±0.20°	±0.5°C

FISHING, WORKOVER & P&A

Fishing, workover and plug & abandonment: the full range of operations to recover, restore and secure wells during drilling, workover or abandonment. Our fishing team responds quickly with a large rental and sale fleet, backed by our own workshop and custom tool design.

2,500	24 / 48h	142	ISO 9001
tools available	response time	fishing, workover and P&A interventions	certified quality management

FISHING

Recovery of rods, strings, BHAs and stuck or lost tools.
Jarring and impact tools, shock tools, intensifiers.
Overshots, spears, die collars, magnets, taper taps.
Tools for rental or purchase.

WORKOVER

Well restoration and preparation for return to production.
Section milling and wash over.
Casing repair: scrapers, impression blocks, junk baskets.
Reaming with RTU, DTU and SPX underreamers.

PLUG & ABANDONMENT

Safe, definitive abandonment of wells.
Cutting with hydraulic pipe cutters and section mills.
Whipstocks and sidetracks, packers, bridge plugs, liner hangers.
Cold cutter, wellhead replacement, casing jack, tanks.

WATER WELLS TOO

We also work on water wells, typically between 300 and 1,000 m, in support of drilling contractors. Habits formed on 3,000 m wells mean we handle shallow wells with the same rigor.

CUT & PULL

Hydraulic and external pipe cutters, spears and overshots to cut and pull casing, tubing or stuck strings.

REAMING

Rotary and directional underreamers, hole openers, roller reamers and SPX drag-type underreamers.

MILLING

Junk mills, pilot and taper mills, section mills and washover shoes.

WHERE WE WORK

Based in Lons (64), south-west France. We mobilise across metropolitan France within 24 to 48 hours in an emergency, and have international experience in Europe and North Africa. A single dedicated team follows each job from diagnosis to resolution.

TOOL CATALOGUE

A selection of the main tools in stock, for rental or purchase. The full catalogue and technical data sheets are available on request. Sizes in inches; tool series are quoted where applicable.

CLEANING	Range
Casing scraper	3-5/8" - 7-7/8"
Impression block	2-1/8" - 13-1/2"
Reverse circ. junk basket	5-5/8" - 17"
Junk basket	3-1/2" - 13-3/8"

MILLING & WASHOVER	Range
Economill	3-3/4" - 12-1/8"
Junk mill	2-1/8" - 17-3/8"
Super junk mill	3-3/4" - 18-3/8"
Pilot mill	3-1/4" - 8-1/2"
Taper mill	2-1/2" - 18-1/2"
Washover shoe	2-9/16" - 13-3/8"

CUTTING	Range
Hydraulic pipe cutter	3600, 5700, 8200, 11700s
Section mill	3600, 5500, 8200, 11700s
External hydraulic cutter	5-5/8" - 8"

RECOVERY	Range
Die collar	4" - 9-5/8"
Fishing magnet	3-3/4" - 15"
Spear, internal	6-3/4" - 8"
Spear	2-3/8" - 20"
Overshot	SFS, SH, XSH, FS
Taper tap	3-1/16" - 8"

REAMING & ENLARGEMENT	Range
Rotary underreamer (RTU)	DTS 350, 5700, 8200
Drilling-type underreamer (DTU)	5700, 8200, 12000, 18000
Master Driller	8200, 14000
Hole opener	14-3/4"
SPX drag-type underreamer	5700
Roller reamer	8200

JARRING & IMPACT	Range
Fishing jar	3-1/8" - 8"
Jar intensifier	3-1/8" - 6-1/2"
Safety joint	3-1/2" - 8"
Stabilizer	3-1/8" - 9-1/2"
Crossover (XO)	3-3/8" - 11-3/4"
Bit / Float sub / Bull nose	2-3/16" - 10-1/4"

FOR WATER WELLS

typically 300 - 1,000 m

Cut & pull: hydraulic pipe cutters, external cutters, spears, overshots, jars.

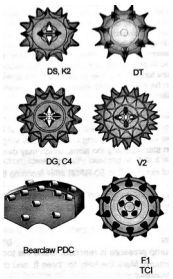

Reaming: RTU, DTU, SPX drag-type, hole openers, roller reamers.

Milling: junk mills, pilot mills, taper mills, section mills, washover shoes.

Stock available, response within 24/48h anywhere in metropolitan France.

UNDERREAMERS

DTU and SPX data sheets available

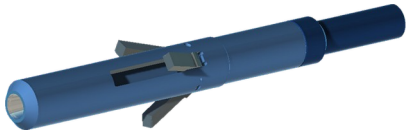

DTU: 6 cutter options (milled tooth, TCI, PDC Bearclaw). SPX: PDC drag-type, arms dressed with tungsten carbide.

HYDRAULIC PIPE CUTTER

Data sheet available

- Internal hydraulic cutter for single or multiple casing strings.
- Mainly for well abandonment, when casings are cemented.
- Four tool diameters cutting 4-1/2" to 36".
- Up to 400 L/min, 35 - 60 bar.

DOWNHOLE TOOLS AND SPECIAL INTERVENTIONS: drilling bits (PDC), jars, stabilizers, tubulars, circulating subs, whipstocks and sidetracks, packers, bridge plugs, liner hangers, casing jack. Custom tools designed with an API 5 & 7 certified machine shop. To request a quotation, specify tool type, size or series, connections and operation.
